Office Automation Software  
Convert Hard Copy Documents To Editable Files

# RE-RITE™

## Office Automation Software

### Convert Hard Copy Documents To Editable Files

The paperless office is closer to reality with **RE-RITE™** office automation software. It will enhance your Toshiba e-STUDIO MFD by allowing it to automatically convert scanned paper documents into fully editable and searchable files. RE-RITE™ will convert a scan of any fixed hard copy original you can put through the e-STUDIO device into a number of editable formats including:

- DOC (Microsoft Word)
- PDF (Adobe Acrobat)
- XLS (Microsoft Excel)
- HTML (Web page)
- e-BOOK (MS Reader)

RE-RITE™ delivers these fully digital files to a network drive or directly to your mailbox simply, efficiently and in full colour.

Driven by advanced OCR technology, RE-RITE™ is fast, accurate and simple to use since it's a server (host PC) based application making it available for many users on a single licence.

Now there's no need to re-type or re-format documents that are only available as hard copy originals. The time saved in simply scanning and converting to fully digital documents is astonishing and will make work quicker, easier and more accurate.

Scan as many pages as you like,  
**no limits!**

Scan with your **e-STUDIO MFD**

**RE-RITE™** loaded on network  
PC or dedicated server

**Files arrive at your workstation**  
via email or network folder in  
choice of formats for editing

## Fabulous Functionality

RE-RITE™ offers a battery of functions as standard. You can select Scan to Network Drive with file format attached or choose Scan to email with an attachment in your preferred file format.
